

IAC 2024 MILAN - ISRAEL SPACE DELEGATION

The International Astronautical Congress in Milan was a landmark gathering, uniting space enthusiasts worldwide for the 75th time. With the theme "Responsible Space for Sustainability," IAC 2024 marked the largest IAC ever, bringing together a diverse community to shape a sustainable future in space.

Over **14,700** attendees from **120 countries** participated in the event, where more than **530 companies** showcased their innovations in the conference exhibition. Additionally, **4,160 presentations and panels** provided insights into the future of space exploration and sustainability.

For the first time, we created an Israeli National Pavilion to serve as a hub for Israeli startups, researchers, and industry leaders to connect with the global space community, foster new partnerships in space exploration and commercialization. A unique art exhibition within the pavilion explored the intersection of space and creativity, with installations and multimedia works by Israeli artists reflecting on the human experience of space and its future potential.

"This was an opportunity to get to know the global space industry up close and to discover real opportunities for the Israeli industry"
Lior Etgar, EBN

ISRAEL SPACE PAVILION

"Truly wonderful. A pavilion of the highest standard—filled with engaging content, featuring a modern, open, and inviting design. A true Israeli pride".

Prof. Moran Bercovici, Technion

90 Israeli delegates

19 Israeli presentations at the conference

18 Israeli companies

over **60** International delegations' visits

10 Israeli artists

over **450** Meetings and connections

"I am so grateful for your exhibit, that I was able to have a space to reflect and that was artful with a human connection".

NASA Delegate

ISRAEL SPACE COMPANIES EXHIBITION

"The Israeli pavilion showcased a nation of strength and capability in space. Bringing companies together under one roof amplified and enhanced our collective power."

Benny Maor, Elbit
